

BioCote[®]

BioCote[®] is the leading brand in antimicrobial technology. BioCote's innovative silver technology is incorporated into Waterlogics mains-fed water dispensers at the time of manufacture, to inhibit the growth of micro-organisms on the coolers surface.

Biocote[®] effectively reduces the levels of bacteria, minimising the risk of cross contamination. It works in tandem with normal cleaning procedures and acts as an additional line of defence.

Features: Biocote[®]

- Added protection against Listeria, Legionella, MRSA, Ecoli and Samonella
- Reduces cross contamination
- Acts as a second line of defence
- Main dispense and contact surfaces are guarded against the proliferation of bacteria
- With UV purification provides total hygiene inside and out
- Only available with Waterlogic mains-fed dispensers

With the unique BioCote® protection, the Waterlogic range of mains-fed water coolers are the natural choice in hygiene conscious environments, where infection control is critical and where heavy usage is expected, such as:

- Schools
- Public spaces
- Food processing establishments
- Hospitals
- Clinics
- Dental surgeries
- Other health care premises

Together with Waterlogic's advanced, in-tank UV water purification systems, the incorporation of Biocote® antimicrobial technology means that customers can feel confident that they are protected both inside and outside their drinking water dispensers.
